

EXECUTIVE BOARD PROPOSAL

CONFIDENTIAL · 2026-V2.4

TM Pick n Pay Express

Evolving Click & Collect into a Multi-Tenant Click-to-Door Delivery Platform

Unifying Retail Networks, Local & Diaspora Shoppers, Informal Traders Through Open Digital Architecture & Last-Mile Delivery

STRATEGIC POSITIONING:

TM Pick n Pay as the primary anchor retail tenant and wholesale backbone driving the entire shared consumer ecosystem.

Confidential · Venture Partnership Proposal

Direct Click-to-Door Grid: Rapid home delivery across Harare, Bulawayo & national corridors.

Disclaimer: Strategic Context & System Boundaries

Framework Scope & Limitations

- **Independent External Analysis:**

This framework represents an independent macro-market outlook formulated without full internal visibility into proprietary sales or marketing initiatives.

- **Macro-Economic Assumptions:**

Strategic models are tailored to Zimbabwe's urban landscape, relying heavily on informal trader aggregation and diaspora remittance capital.

- **Anchor Infrastructure:**

Implementation models depend on partnering with anchor retail institutions (TM Pick n Pay) as physical distribution and wholesale supply hubs.

Data & Financial Boundaries

- **Intelligent Commerce Foundation:**

Financial viability is underpinned by a shared data lake and AI intelligence platform as the catalyst for commercial adaptability and margin growth.

- **P&L and Pipeline Projections:**

Illustrative financial models (\$61.2M GMV pipeline) establish a path toward baseline profitability within an abnormal operating environment.

- **Technical & Payment Ecosystems:**

Assumes integration of multi-currency cross-border payment gateways, owned electric scooter fleets, and bank-agnostic remittance rails.

Capitalizing on Structural Market Inefficiencies

THE "ABNORMAL P&L" REALITY

Evaluating operations based on historical financial "normalcy" is no longer viable. Success requires investing in operational adaptability out of the ordinary, turning defensive infrastructure costs into offensive P&L drivers.

Adaptability Over Store CapEx

THE OPTIMIZATION GAP

A multi-million dollar distribution gap exists that can only be closed by an open platform integrating three vectors:

Diaspora Market – Buyers continue to buy via cross-boarder delivery, exposing a resilient remittance shopper market ripe for capture.

Informal Retail Traders – A wholesale supply gap exists, creating an opportunity to aggregate informal traders to distribution partners.

Customer Convenience – Online ordering and payment of goods plus doorstep delivery saves costs on transport, fuel, and time.

DATA-DRIVEN INTELLIGENCE AS MOAT

In a highly informalized economy, data blindness is a structural risk. Underpinning the entire ecosystem with a robust, shared corporate data lake and AI-driven intelligence becomes the ultimate catalyst for profitability, sustainability, and market adaptability.

End Data Blindness via AI

Bypassing Physical Logistics & Operational Friction

● LEGACY SYSTEM — STORE-BOUND CLICK & COLLECT

Local Shopper

Web / App Order

Recipient Travel Required

Urban Flagship Branch Only

● STRATEGIC EVOLUTION — MULTI-TENANT CLICK-TO-DOOR & B2B ENGINE

Local & Diaspora Shopper

Multi-Currency Gateway

**TM Pick n Pay Anchor Retail
Node**

Courier & Informal Fleet

Direct Door & Informal Trader

OVERCOMING PHYSICAL BARRIERS

Rural, diaspora-funded, and elderly recipients cannot easily reach flagship urban branches. Direct Click-to-Door fulfillment removes physical travel friction entirely.

UNLOCKING B2B & DIASPORA GROWTH

Guarantees global sponsors direct household delivery verification while transforming informal traders into localized wholesale partners, expanding TM PnP market reach.

What the platform uniquely delivers

First-mover advantage

Defensive moat against OK Zimbabwe & Choppies by establishing the definitive direct-to-door pipeline first.

Multi-tenant retail engine

Turns TM Pick n Pay's 74+ store estate into high-velocity fulfillment & wholesale distribution hubs.

Diaspora capital capture

Direct multi-currency checkout (USD, GBP, ZAR) routing remittance funds straight into retail goods.

Informal trader aggregation

Transforms informal spaza traders from competitive friction into localized B2B distribution partners.

Data-driven intelligence moat

Shared corporate data lake tracking customer lifetime value, basket behavior, and real-time inventory velocity.

Bank & payment agnostic

Multi-currency gateway supporting cards, local bank rails, mobile money, and digital settlement.

Operational adaptability

Turns defensive infrastructure costs into offensive, high-margin P&L drivers (margins, delivery, tech fees).

Direct household reach

Bypasses physical logistics barriers for rural and elderly families through localized courier fleets.

Data-Smart Pipeline Projections: Minimum Viable Business Case

SAMPLE SIZE

40,000

Active cross-border and domestic families modeled in baseline sample.

AVERAGE BASKET

\$85

Calculated family basket expenditure footprint averaging \$85/month.

PIPELINE VALUATION

\$61.2M

Pipeline valuation consolidating core remittance & local buying.

MACRO SCALING

500k+

Target diaspora population pool between 100,000 and 500,000+ senders.

MINIMUM VIABLE BUSINESS CASE SUMMARY

\$61,200,000 Annual Pipeline

$40,000 \text{ families} \times \$85/\text{month} \times 18 \text{ orders}/\text{yr} = \61.2M gross transaction throughput migrated into a digital, tracked, corporate retail ecosystem with multi-tier monetization layers.

Consolidated Ecosystem Throughput & Revenue Calculations

40,000 Diaspora Shoppers (US\$61.2M GMV Baseline)

PHASE 1 · CORE GROSS ECOSYSTEM THROUGHPUT

Gross Retail Basket GMV \$61.2M Diaspora Throughput	US\$61,200,000
Last-Mile Delivery Fees 720k drops @ \$4.50 gross fee	US\$3,240,000
Cross-Border Card Surcharge 3% gateway/FX fee on \$61.2M	US\$1,836,000
Diaspora Priority Memberships 6,000 subscribers @ \$8.99/mo	US\$647,280
Retail Media Network (1.2%) 1.2% ad/promo share on GMV	US\$734,400
Phase 1 Gross Throughput	US\$67,657,680

PHASE 2 · RECURRING SUBSCRIPTION LAYER

Tenant platform fees (240 @ \$249)	US\$717,120
Rider plans (900 @ \$45)	US\$486,000
Garage & maintenance plans (900 @ \$18)	US\$194,400
Data & price intelligence (40 @ \$1,500)	US\$720,000
Shopper plans (45k @ \$3.99)	US\$2,154,600
Tuck-shop trading app (3.5k @ \$9.99)	US\$419,580
Phase 2 Subscriptions Subtotal	US\$4,691,700

COMBINED ANNUAL ECOSYSTEM OUTPUT (GROSS GMV + SERVICES)
Phase 1 Gross Throughput (\$67.66M) + Phase 2 Subscriptions (\$4.69M)

US\$72,349,380 Gross

Benefits to TM Pick n Pay and the market

● **Faster market entry**

Existing developer integrations accelerate rollout.

● **Customer convenience**

Digital shift lets diaspora and local customers buy from anywhere.

● **Expanded customer base**

Diaspora markets plus multiple banks' captured audiences.

● **Replacement of informal trading**

A legitimate, tax-compliant alternative to unreliable channels.

● **Cross-border resilience**

Bypasses constraints on physical goods movement between countries.

● **Economies of scale**

Better prices and smaller packages matched to consumer cash flow.

● **Increased loyalty & retention**

Secure, reliable delivery builds trust vs informal traders.

● **Revenue diversification**

Subscriptions, fees or discounts plus wholesale partnerships.

● **Scalability**

Regional expansion with packaging adapted to local needs.

● **Convenience-driven adoption**

Small daily-use packages fit township and village habits.

● **Government alignment**

Formalized trade supports taxation and regulation.

Aligning risk, capital and structure

OPTION 1 Independent Concierge (Reseller)

We operate as a standalone entity mirroring your catalog via API. Senders pay us in US\$; we buy stock from TM PnP at a negotiated wholesale discount and fulfill with our own driver network.

SETUP FEE

TBA

COMMERCIAL SPLIT / TAKE

5–8% markup + 3–5% rebate

OPTION 2 White-Label Software Licensing

We build the cross-border storefront extension and license it to TM PnP. It integrates into tmpnponline.co.zw, natively branded, fulfilled by third-party Zimbabwean couriers.

SETUP FEE

TBA

COMMERCIAL SPLIT / TAKE

1.5–2% GMV revenue share

The end state is a trading platform, not a single-retailer app

PHASE 1 · ENTRY

TM Pick n Pay value-add

Single-tenant. TM branded, TM catalogue, TM fulfilment. The platform earns its place inside one retailer before anything else is discussed.

PHASE 2 · DEPTH

Wholesale and informal channel

TM supplies tuck shops and repackagers through the same rails. Volume grows without adding a competing banner to the storefront.

PHASE 3 · END STATE

Retail-agnostic trading platform

Shopper asks for cooking oil; the request goes to every participating supplier and the best price wins. Retailers become suppliers on a marketplace.

Multi-tenant has already been prototyped — three banners running in one app — then deliberately pulled back to a single tenant for the entry conversation.

Sequencing is the safeguard: introduce the platform as a TM advantage, without signalling that competitors sit on the same rails on day one.

Full basket comparison drives repeat customer conversion

SHOPPER REQUEST · STANDARD FAMILY BASKET (~\$85)

TM Pick n Pay

Lowest Basket Total · Best Value (12/12)

US\$83.40

OK Zimbabwe +US\$3.70 vs TM PnP (12/12)

US\$87.10

Spar Zimbabwe +US\$6.10 vs TM PnP (12/12)

US\$89.50

Food Lovers Market +US\$9.40 vs TM PnP (11/12)

US\$92.80

Basket-Level Comparison Engine

When a diaspora shopper builds a ~\$85 family grocery basket, the engine calculates live total basket pricing across TM Pick n Pay, OK Zimbabwe, Spar, and Food Lovers. Total basket savings drive conversion far more effectively.

Merchant Routing & Basket Optimization

The engine evaluates item availability, branch proximity, and total basket price. TM Pick n Pay's competitive pricing on essential household staples ensures it consistently wins default basket allocation.

The last mile is owned, not outsourced

500–2,000

Platform owned scooters

12 months

Rent-to-buy, then the rider owns it

~5 months

Asset pays itself back

~10%

Platform fee per dollar earned after ownership

Rent-to-buy

The rider operates for twelve months and then owns the scooter. The asset repays itself in roughly five months; months six to twelve are margin.

Advertising rights

Livery is sold on subscription: 80% reserved for anchor retailer, 20% open inventory. A moving media network across delivery routes.

Own the garage

Repairs, parts and accessories stay inside the platform on a maintenance plan. Electric tricycles extend fleet into rural routes with women riders as the first cohort.

Bank-agnostic by design, multi-bank in practice

What we say to banks

Plug your remittance APIs into the platform and we bring transaction share-of-wallet: recurring diaspora flows landing as retail settlement rather than cash-out.

No exclusivity is requested and none is given. Every rail is one integration among several, so pricing stays competitive and no single institution gates the platform.

What we say to the retailer

Banks bring critical mass. Their diaspora bases are already captured audiences; the platform converts those balances into baskets inside your estate.

Institutions under discussion are prospects at this stage. Nothing is presented in-app as a confirmed partnership until an agreement is signed.

Design rule: no bank-specific logic in the core. Rails are adapters, so adding or dropping an institution is a configuration change, never a rebuild.

Turn 74+ branches into a local and diaspora Click-to-Door delivery fulfilment network

Recommended next step: select a commercial structure and mandate a 60-day pilot on two flagship Harare branches.
