

● **EXECUTIVE BOARD PROPOSAL · AGNOSTIC MARKETPLACE INFRASTRUCTURE**

TM Pick n Pay Marketplace & Last-Mile Delivery Infrastructure

Evolving Click & Collect into a Multi-Tenant Click-to-Door Delivery Ecosystem —
Unifying Retail Networks, Diaspora Shoppers, and Informal Traders Through Open
Digital Architecture.

CORE STRATEGIC POSITIONING

An open-architecture, multi-tenant marketplace framework with **TM Pick n Pay** uniquely positioned as the primary anchor retail tenant and wholesale supply backbone driving the entire shared consumer ecosystem.

Diaspora Capture

\$61.2M Baseline GMV Corridor via
USD/GBP/ZAR

Owned Last Mile

500–2,000 Electric Scooters on
Rent-to-Buy

Data Lake Moat

AI-driven basket intelligence & CLV
tracking

Informal B2B

Wholesale supply to 10,000+ local
tuck-shops

Executive Summary & Strategic Context

Capitalizing on macroeconomic structural shifts through intelligent commerce and multi-channel aggregation.

THE "ABNORMAL P&L" REALITY: INVESTING IN OPERATIONAL ADAPTABILITY

Evaluating retail operations in Zimbabwe based on historical financial "normalcy" is no longer viable. In an economy undergoing rapid informalization, protecting a static brick-and-mortar balance sheet leads to margin attrition. Sustainable enterprise leadership requires investing in operational adaptability—turning defensive operating expenses into an aggressive, technology-driven growth engine that captures non-traditional cash flows.

BASELINE PIPELINE TARGET

\$61,200,000

40,000 diaspora families spending \$85/month across 18 annual orders.

74+ TM PnP Stores as Digital Hubs

THE FOUR STRATEGIC PILLARS OF THE UNIFIED MARKETPLACE

Core Investment Vectors

01 Customer Closeness & Data-Smart CLV

Re-establishing direct consumer intimacy ('Know Your Customer'). Building end-to-end digital visibility into household preferences, purchase velocity, replenishment frequency, and spending triggers across domestic and diaspora buyers.

Impact: Transforms passive in-store footfall into active, predictive demand tracking with personalized basket incentives and high lifetime customer value.

02 Informal Market Aggregation & B2B Wholesale

Formally embracing Zimbabwe's massive informal retail sector (10,000+ township spaza shops and tuck-shops). TM Pick n Pay steps in as the bulk wholesale supplier, cleaning supply chains and turning informal traders into affiliated distribution nodes.

Impact: Displaces unregulated cross-border gray market smuggling, counterfeit goods, and unmanaged tax leakage while expanding physical footprint with zero CapEx.

03 Diaspora Capital Capture (\$61.2M Baseline)

Intercepting the resilient 100,000 to 500,000+ global diaspora corridor (South Africa, United Kingdom, USA, Australia). Enables seamless multi-currency checkout (USD, GBP, ZAR, AUD) that routes remittance directly into corporate retail settlement.

Impact: Guarantees direct household doorstep delivery verification for overseas sponsors rather than cash diversion, securing guaranteed retail spend.

04 Intelligent Commerce & Corporate Data Lake

Underpinning the entire multi-tenant grid with a unified corporate data lake and AI intelligence layer. Powers real-time basket optimization, predictive stock replenishment, dynamic pricing, and monetization streams sold to FMCG brand manufacturers.

Impact: Eliminates dangerous 'data blindness' in an informalized economy, serving as the foundational catalyst for profitability, sustainability, and adaptability.

STRATEGIC BOUNDARIES & INDEPENDENT ANALYSIS DISCLAIMER

This framework represents an independent macro-market strategic outlook formulated without internal access to TM Pick n Pay's proprietary marketing datasets. Strategic models assume TM Pick n Pay serves as the premier anchor retail institution and wholesale fulfillment grid. Financial models (\$61.2M baseline GMV) establish a conservative path toward market share capture within an abnormal operating environment.

ANCHOR STORES

74+ National Branches

TARGET DIASPORA POOL

100k – 500k+ Senders

FULFILLMENT SLA

< 45 Min to Door

DELIVERY FLEET

Electric Scooters / E-Trikes

Capitalizing on Structural Market Inefficiencies

Bypassing physical logistics barriers and capturing cross-border foreign currency liquidity.

THE OPTIMIZATION GAP

A multi-million dollar distribution gap exists that can only be closed by an open platform integrating three vectors:

Diaspora Market

Buyers continue to buy via cross-boarder delivery, exposing a resilient remittance shopper market ripe for capture.

Informal Retail Traders

A wholesale supply gap exists, creating an opportunity to aggregate informal traders to distribution partners.

Customer Convenience

Online ordering and payment of goods plus doorstep delivery saves costs on transport, fuel, and time.

OPERATIONAL SHIFT: LEGACY CLICK & COLLECT VS. MULTI-TENANT CLICK-TO-DOOR ENGINE

❌ LEGACY MODEL — STORE-BOUND CLICK & COLLECT (HIGH FRICTION)

Local Shopper Only

Web / App Order

Recipient Travel Req.

Urban Flagship Only

High Churn & Friction

✅ STRATEGIC EVOLUTION — MULTI-TENANT CLICK-TO-DOOR & B2B WHOLESALE ENGINE

Multi-Tenant Architecture & Intelligent Commerce Moat

Open digital infrastructure designed to scale market transactions without single-retailer limitations.

**AGNOSTIC INCEPTION**

Built from day one as an open-ended, multi-tenant marketplace framework ("Takealot for Southern Africa"), rejecting single-retailer application restrictions and siloed codebases.

High-throughput API adapters for any vetted merchant or courier.

**ENTERPRISE SEGREGATION**

Drives massive aggregate market volume across the grid while preserving the capacity for TM Pick n Pay to partition dedicated, white-labeled private spaces (tmpnpnonline.co.zw).

Cryptographic tenant isolation and strict corporate data segregation.

**DATA LAKE AS MOAT**

Eliminates data blindness by tracking customer lifetime value (CLV), household replenishment velocity, basket triggers, and selling anonymized analytics back to FMCG suppliers.

Real-time algorithmic demand forecasting & dynamic pricing.

**BANK-AGNOSTIC BY DESIGN, MULTI-BANK & CROSS-BORDER IN PRACTICE**

Zero Core Bank Lock-In

Design Rule: No bank-specific logic in the core codebase. Banking rails operate as modular plug-and-play adapters, allowing institutions to be connected or replaced via simple configuration changes without requiring code rebuilds.

- Global Diaspora Checkout**

Accepts Visa, Mastercard, AMEX in USD, GBP, ZAR, AUD. Smart routing dynamically chooses optimal acquiring bank by shopper origin.
- Local Settlement Rails**

Integrated with ZimSwitch, EcoCash, InnBucks, and direct ZIPIT bank integrations for domestic buyers and tuck-shop B2B replenishment.
- Crypto & Remittance Fallback**

Automatic fallback to USDC stablecoin rails and Western Union API bridge if foreign card acquiring experiences interbank disruption.

VALUE PROPOSITION TO COMMERCIAL BANKS

Banks plug remittance APIs into the platform and gain valuable transaction share-of-wallet: recurring foreign currency inflows landing directly as merchant retail settlement rather than un-banked cash-out.

VALUE PROPOSITION TO TM PICK N PAY

Banks bring massive captured audiences; the marketplace platform instantly converts diaspora bank account balances into physical grocery baskets fulfilled inside TM Pick n Pay's national branch network.

Decentralized Footprint Expansion Without Capital Expense

Extending physical coverage into high-density townships and rural communities by turning informal traders into logistics nodes.

**CORPORATE AS DISTRIBUTOR**

Repositions TM Pick n Pay to step in as the primary bulk wholesale distributor to independent informal retail networks, capturing previously unreachable transaction volume.

TM PnP becomes the wholesale supply backbone of Zimbabwe.

**GRAY MARKET DISPLACEMENT**

Displaces un-policed cross-border gray trading, tax evasion, and counterfeit products by feeding verified, high-quality corporate inventory straight into township shops.

Legitimizes trade, aligns with government & protects consumers.

**ZERO-CAPEX MICRO-NODES**

Integrates affiliated informal local traders as decentralized collection and delivery nodes, bypassing heavy brick-and-mortar building costs while accelerating speed to door.

Instant density across townships without building new branches.

B2B INFORMAL TRADER PLATFORM ARCHITECTURE & REPLENISHMENT FLOW

US\$9.99 / MONTH TRADER APP

1

Trader Orders in App

Tuck-shop orders bulk sugar, flour, oil via mobile app at wholesale tiers.

2

Automated TM Staging

Nearest TM PnP branch stages pallet orders in dedicated B2B collection bays.

3

Consolidated Dispatch

Electric cargo tricycles or trucks route consolidated deliveries to commercial bazaars.

4

Neighborhood Drop

Trader acts as neighborhood click-to-collect pickup point for nearby residents.

Target Trader Base: 3,500 Active Township Spazas

Annual Subscription Yield: US\$419,580

**NATIONAL ECONOMIC IMPACT & FORMALIZATION BENEFIT**

By transforming 10,000+ unorganized informal traders into structured retail affiliates of TM Pick n Pay, the platform cleans the national food supply chain, reduces price gouging in townships, restores formal VAT and tax compliance, and guarantees that communities receive safe, authentic consumer staples.

Township Density: 10-20 Shops / Bazaar

Targeted B2B Volume: \$15M+ Wholesale GMV

Physical CapEx Saved: 100% (Asset-Light)

The Last Mile is Owned, Not Outsourced

Building a proprietary green electric delivery grid with sustainable rider lease-to-own economics.

FLEET CAPACITY

500 – 2,000

Electric Scooters & Trikes

RENT-TO-BUY PERIOD

12 Months

Full Asset Ownership Transfer

ASSET PAYBACK

~5 Months

Months 6-12 Are Net Margin

POST-OWNERSHIP TAKE

~10% Fee

Per Dollar Earned Perpetual

RENT-TO-BUY EMPOWERMENT

Riders pay daily operational lease fees for 12 months, after which they own the scooter. The asset repays itself in roughly 5 months; remaining months provide software margin.

Drives exceptional rider retention, vehicle care, and SLA reliability.

MOVING MEDIA NETWORK

Scooter delivery boxes and fairings act as moving billboards: 80% reserved exclusively for TM Pick n Pay branding; 20% monetized as open advertising inventory for top FMCG brands.

High-visibility brand dominance across Harare and Bulawayo roads.

IN-HOUSE GARAGE ECOSYSTEM

Repairs, certified spare parts, battery swap stations, and maintenance remain inside the platform via a mandatory \$18/mo subscription plan, preserving uptime and asset life.

Generates \$194k+ annual recurring garage subscription revenue.

INCLUSIVE RURAL LOGISTICS & WOMEN RIDER E-TRICYCLE COHORTS

To service peri-urban townships, dirt road networks, and rural growth points without damage to standard two-wheelers, the platform deploys heavy-duty cargo electric tricycles. The first designated cohort of tricycle operators is structured specifically for women riders, creating high-dignity entrepreneurial employment and trusted doorstep community engagement.

✓ 300kg Cargo Payload per Trike ✓ Dual Battery Range > 120km ✓ Solar Charging Depot Integration

Rider Fleet Plans: 900 riders @ \$45/mo = **\$486,000/yr**

Delivery Fee Volume: 720,000 drops @ \$4.50 = **\$3,240,000/yr**

Full Basket Comparison Engine & Customer Journey

Driving repeat customer conversion through transparent total family basket savings and single-cluster logistics.

THE CLUSTER LOGISTICS RULE

Why Basket Comparison beats Item Splitting:
Allowing shoppers to split a single basket across 3 different physical supermarkets creates a multi-stop courier logistical nightmare.

Instead, the comparison engine calculates the *entire basket total* at once. TM Pick n Pay's price competitiveness on staple goods ensures it captures the complete order into a single fulfillment hub.

✓ 100% Single-Store Fulfillment per Delivery Run

END-TO-END TRANSACTION & FULFILLMENT LIFECYCLE

1. Diaspora Order

Shopper in London/Joburg selects basket for family in Harare.

2. Foreign Payment

Paid in GBP/USD via card. Instant FX & retail settlement.

3. TM Store Picking

Nearest branch receives order; staged in pickup bay in <15 min.

4. Scooter Dispatch

Dedicated e-scooter rider dispatched with GPS route tracking.

5. Doorstep Delivery

Delivered to household with photo proof & SMS sent to sponsor.

GUARANTEED SPONSOR PEACE-OF-MIND

Diaspora sponsors receive instant photographic proof of delivery and itemized digital receipts, eliminating family friction and cash misallocation.

Aligning Risk, Capital, and Commercial Structure

Two evaluated commercial operating models designed to match TM Pick n Pay's risk appetite and balance sheet strategy.

Fastest Execution • Zero Direct Retail Risk

Option 1: Independent Concierge & Reseller

The venture operates as an independent concierge entity mirroring TM Pick n Pay's catalog via high-throughput API. Diaspora and local shoppers pay in foreign currency; we purchase stock from TM PnP at wholesale discount and fulfill through our dedicated last-mile courier fleet.

SETUP FEE	COMMERCIAL TAKE
TBA / Capitalized in Working Capital	5-8% Gross Markup + 3-5% Wholesale Rebate

KEY DIVISION OF ROLES:

- ✓ **TM PnP:** Catalog and inventory data feed access via secure API
- ✓ **TM PnP:** Bulk wholesale pricing structure and dedicated store collection bays
- ✓ **TM PnP:** Wholesale volume rebates paid on monthly throughput thresholds

Financial Implication: TM PnP gains guaranteed incremental basket volume and foreign currency cash receipts with zero logistics overhead.

Enterprise Integrated • Strategic Long-Term Moat

Option 2: White-Label Software Licensing & Platform SaaS

We deploy the complete cross-border storefront, data lake, intelligent dispatch, and rider application suite as a licensed white-label extension directly integrated into tmpnponline.co.zw and TM Pick n Pay's corporate ERP.

SETUP FEE	COMMERCIAL TAKE
TBA / Enterprise Integration Scope	1.5-2.0% GMV Revenue Share

KEY DIVISION OF ROLES:

- ✓ **TM PnP:** Direct brand ownership, customer relationship management, and promotion
- ✓ **TM PnP:** Integration into corporate banking facilities and merchant acquiring
- ✓ **TM PnP:** Contracting third-party or dedicated courier fleets using platform software

Financial Implication: Lowest marginal operating cost for TM PnP, establishing a proprietary digital ecosystem over a 5 to 10-year horizon (120 months).

STRATEGIC PREFERENCE: LONG-TERM SAAS STABILITY VS TRANSACTION VOLATILITY

Our recommendation is to establish long-term contract structures modeled on **5 to 10-year commercial horizons (120 months)**. This aligns multi-tier subscription streams (Logistics access, Trader app, FMCG Data Lake intelligence) to secure predictable, compounding valuation for TM Pick n Pay and its partners.

Horizon
5 - 10 Years

Zero Net CapEx

Time-to-Pilot
60 Days

Operational Roadmap, 60-Day Pilot & Governance

Structured deployment execution from executive alignment to field mapping, pilot launch, and national expansion.

SPRINT 01

Weeks 1 – 3

Executive Alignment & Strategic Mandate

Focus: Governance & Architecture Consensus

- Finalize commercial model selection (Concierge vs. White-Label SaaS)
- Establish venture steering committee and executive reporting cadences
- Define regulatory, foreign exchange, and tax compliance frameworks

SPRINT 02

Weeks 4 – 7

Field Mapping & Pilot Merchant Densification

Focus: Harare & Bulawayo Supply Hubs

- Deploy field discovery teams to map 500+ tuck-shops and spaza vendors
- Assess branch fulfillment capacity and staging bays at 2 flagship stores
- Onboard initial 50-rider electric scooter cohort and lease contracts

SPRINT 03

Weeks 8 – 11

API Blueprinting & Secure Systems Integration

Focus: Data Lake, Payment Rails & ERP

- Connect real-time SKU inventory and pricing feeds from TM PnP ERP
- Deploy bank-agnostic multi-currency payment gateway and USDC fallback rails
- Implement real-time driver dispatch, SMS tracking, and proof-of-delivery

60-DAY PILOT

Months 3 – 4

Live Operations across 2 Flagship Harare Branches

Focus: Controlled Market Validation

- Process 5,000+ live diaspora & local orders with sub-45 minute SLA
- Validate basket comparison algorithms and wholesale tuck-shop replenishment
- Audit unit economics, customer satisfaction (NPS > 75), and rider payback

NATIONAL SCALE

Months 5 – 12+

Rollout Across 74+ Store Estate & Regional Corridors

Focus: National Omnichannel Dominance

- Scale fleet to 1,500+ e-scooters across Bulawayo, Mutare, Gweru, and Masvingo
- Expand informal trader network to 3,500+ active B2B tuck-shops
- Commercialize FMCG Data Lake intelligence stream to top 40 brand partners

RECOMMENDED IMMEDIATE NEXT STEP: MANDATE 60-DAY HARARE PILOT

HARARE FLAGSHIP BRANCHES

Select preferred commercial operating model (Option 1 Reseller vs Option 2 White-Label SaaS) and authorize a controlled 60-day live pilot across two flagship Harare branches (Borrowdale & Avondale) with 50 dedicated e-scooter couriers.
